**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-3, 6-12, 14-15 are rejected under 35 U.S.C. 102(e) as being anticipated by Ung et al (US2003/0008635A1).

Consider claims 1, 6-7, 11-12. Ung teaches a method and system of crediting a balance of a prepaid subscriber account in a telecommunication network, comprising receiving a voucher transaction, the voucher transaction including a voucher balance (replenish balance \$25.00 or \$50.00) and a voucher discount value (\$0.35 or \$0.25 per minute; page 2, paragraph 0018); obtaining an account balance and an account discount value of an account associated with the voucher transaction (current stored dollar balance and plan rate; page 3, paragraphs 0041-0045); and calculating a composite balance and a weight discount, the weight discount is a function of the voucher balance, the voucher discount value, the account balance, and the account discount value (page 3, paragraphs 0041-0047). Scratch card log (407, page 3, prg. 0040) reads on the second database and the subscriber account database (403, page 3, prg. 0048) reads on the first database.

Art Unit: 2643

Consider claim 2. Ung further teaches receiving a voucher transaction including an account id that specifies the account associated with the voucher transaction (page 3, paragraph 0038).

Consider claims 3, 14. Ung's figs. 2-3 read on the limitations of this claim.

Consider claims 8, 15. Ung further teaches a balance field and discount field (adjusted balance 504 and latest plan rate 506).

Consider claim 9. Ung's fig. 1 reads on the limitations of this claim.

Consider claim 10. Ung's fig. 1 reads on the limitations of this claim.

3. Claims 16-18 are rejected under 35 U.S.C. 102<sup>b</sup>(~~e~~) as being anticipated by Jagadish (5,844,972).

Consider claim 16. Jagadish teaches reading a subscriber identifier (ANI, col. 3, ln. 10-26); retrieving an account balance (col. 4, ln. 47-54) and an account discount value of an account record associated with the subscriber identifier (col. 3, ln. 65 to col. 4, ln. 27); initiating a timer upon a call setup attribute to a subscriber having the account assigned thereto; and deducting units from the account balance, the units deducted based upon a timed call duration accumulated by the timer, an airtime rate, and the account discount value (col. 5, ln. 65 to col. 6, ln. 33).

Consider claim 17. Jagadish further teaches that deducting units from the account further comprises deducting a product of the timed call duration, the airtime, and the discount value from the account balance (col. 5, ln. 65 to col. 6, ln. 33).

Art Unit: 2643

Consider claim 18. Jagadish further inherently teaches terminating deductions from the balance upon call termination; and writing the balance having the units deducted therefrom in the record.

*Allowable Subject Matter*

4. Claims 4-5, 13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. Claims 19-20 are allowed over the prior art of record.

*Response to Arguments*

In response to applicant(s) arguments regarding that Ung does not teach, “calculating a composite balance and a weighted discount is a function of the voucher balance, the voucher discount value, the account balance, and the account discount value”, Ung clearly teaches a composite balance (adjusted\$balance) in which

Composite balance = adjusted\$balance = \$balance1 x (rate2/rate1) + \$balance2;

Weighted discount = (rate2/rate1) = (adjusted\$balance - \$balance2)/\$balance1;

Wherein

Voucher balance = \$balance2

Voucher discount value = rate 2

Account balance = \$balance1

Account discount value = rate 1.
